Dear Barb,

What an excellent course on autism training!

Everything you need to know from A to Z about dealing with Autism patients, caregivers and parents. Barb Lebo is a fantastic educator and a captivating speaker who is enthusiastic, direct and right to the point.

She knows what she's talking about as she is living it first hand with her son Braeden.

A very positive learning experience and as a dental hygienist, I have learned so much that I can implement in our daily dental practices. Barb is very passionate and engaging throughout the entire duration of the lecture.

She provides you with a great workbook and many take away materials. This course is very informative and interactive which every dental professional should take.

Thank you for this great course Barb, as it has taught me a great deal on how to implement strategies on an individual basis when in practice and how we can market our practice as special needs specialists!

Warm regards,

Gina Tatalias-Mazza
